

# INTRODUCTION

Thank you for taking the time to visit our public exhibition today. These boards will provide you with an overview of the proposed development which includes a new teaching block, kitchen extension and all-weather games area.

Freshwaters Primary Academy currently operates as a 2-form entry (420 pupil) facility but does not have the necessary teaching and support spaces for its pupils. These proposals seek to address this issue by providing additional space in the new teaching block. It is not proposed to increase the number of pupils or staff at the school.

The new all-weather games area will provide another facility for sports and outdoor activities to the south of the existing playing field.
